SUMMARY

PHP Laravel Developer with experience developing ERP modules, business workflows, REST APIs, and database-driven applications. Skilled in Laravel, Vue.js, and MySQL, with a focus on translating business requirements into practical software solutions.

EXPERIENCE

❖ PHP Developer

Flexgrew Technologies | July 2025 - Present

- Independently developed production-ready modules for a multi-tenant ERP platform.
- Built a configurable **Custom Import Module** for import data from **excel** with **dynamic field mapping, data transformation, validation rules** and **automated data processing** and reduced manual entries by **90%**.
- Designed and developed **Purchase Lifecycle workflows** from **procurement to stock batch management** and implemented **HR management** modules.
- Designed and developed **RESTful APIs** and optimized MySQL queries to improve application scalability and performance.
- Followed MVC architecture, coding standards, version control practices, and project delivery timelines.
- Analyzed requirements, troubleshoot issues, and delivered features within project timelines.

EDUCATION

❖ Class - XII (Gujarat Board) with 86.85%

- Jay Vijay School, Rajkot, Gujarat | 2022-2023

❖ Bachelor of Computer Application (BCA) with 7.4 CGPA

- Saurashtra University, Rajkot, Gujarat | 2023-2026

SKILLS

❖ Backend Technologies : PHP

❖ Frontend Technologies : HTML, CSS, Bootstrap, JavaScript, AJAX, jQuery

❖ Frameworks : Laravel, Vue.js

❖ Database : MySQL

❖ APIs & Integrations : REST API Development, Stripe integration

❖ Version Control : Git

PROJECTS

❖ Ecom | [\[GitHub\]](#)

- Developed a **web application** using **MVC architecture**.
- Implemented **authentication and role-based authorization mechanisms**.
- Integrated **Stripe payment gateway APIs** for secure transaction processing.
- Designed and integrated RESTful APIs while optimizing database queries for improved performance.
- Utilized **Pinia for state management** to ensure efficient frontend data flow and scalability.
- **Tech Stack:** Laravel, Vue.js, MySQL, Stripe Integration

❖ TheEmployee | [\[GitHub\]](#)

- Developed a centralized employee management system with CRUD operations and role-based access control.
- Developed **authentication and authorization workflows** with **role-based access control (RBAC)**.
- Implemented **server-side validation** and optimized **database interactions** for data consistency.
- **Tech Stack:** PHP, MySQL, JavaScript, Bootstrap
